

OUR SERVICES

ARBORICULTURAL CONSULTING

We offer complete and comprehensive arboricultural consulting services.

Typically arborist reports are required by most cities for tree removal and to obtain construction permits when protected trees are located on the property. Additionally, arborist reports are useful when tree owners seek an assessment of the health and condition of their trees, to identify potential hazard or simply desire to implement a tree care maintenance plan to ensure the health and longevity of their trees.

We offer the following arboricultural services:

- Hazard Assessments and Reports
- Tree Preservation and Development Reports
- Tree Survey & Inventory Reports
- Tree Appraisal Report
- Tree Planting Lists
- Disease and Pest Diagnosis
- Consultations

Please contact us to see how we can meet your arboricultural requirements.

Ned and his crew did an outstanding job. They are true professionals – knowledgeable, patient, meticulous and hard working. Ned has promised to check in periodically and answer any questions I have. He said I could contact him anytime. It was a pleasure doing business with them. **Judy Noice — Palo Alto, CA**

LANDSCAPE DESIGN SERVICES

We provide a full range of landscape design services with a unique and comprehensive focus on preservation of your existing treescape.

Conflicts often occur from landscape designs that fail to consider the impact the new construction can have on the existing treescape. Countless times the health of the existing trees are compromised in the process of landscape construction because of poor design.

We strive to create harmony and balance with your existing trees and to prevent any tree impacts during the landscape design and installation process.

Our design services are frequently utilized by other architectural, design and construction companies to ensure the survivability of high valued trees during the planning and development stages of construction projects.
